

Aerosol Penetrating Release Agent

Instantly penetrates and loosens rust, corrosion and scale.

- Protects surfaces from rust and corrosion
- Coats surfaces with a film of moly lubricant for easier lubrication
- Frees oxidised metal parts
- Works instantly

Description

Areas of Application

- Nuts and bolts
- Frozen battery terminals
- Rusted rims
- Clocks and watches
- Heavy construction equipment
- Motor block studs and bolts
- Aluminium heads
- Boiler heads
- Cylinder blocks
- Flanges

Features and Benefits

Loosens rust and corrosion instantly. It also contains special inhibitors that prevent further rust and corrosion and prolongs the life of parts.

Frees frozen nuts, bolts and fittings without damage to metal components.

Penetrates and releases parts quickly allowing work to move quicker.

Penetrates even hard-to-reach places and is easily sprayed on surfaces.

Approved by the Australian Quarantine Inspection Service (AQIS) #1027 as a Lubricant Type C.

WARNING: Consult the label for full instructions and precautions before using this product.

Technical Specifications	
Contains	Moly for superior lubrication
Does not contain	Chlorofluorocarbons
Penetration rate	Approximately 5 - 30 seconds
Flashpoint	27°C
Protect	From sunlight and temperatures exceeding 50°C
