

Concentrated Cold Galvanising Aerosol

Forms a barrier that prevents rust and corrosion of metals

- Forms a fully protective barrier against moisture
- Protects bare metals - no primer or final coating needed.
- Dries to the touch in 10 - 15 minutes
- Resists flaking and blistering

Description

Areas of Application

- Industrial
- Agricultural
- Grounds care
- HVAC
- Construction
- Transportation
- Marine

Features and Benefits

Zinc 95 can be applied to bare metals and surfaces which have been factory or hot-dipped galvanised.

Zinc 95 requires no surface preparation and dries quickly for immediate protection.

Forms a galvanic barrier that withstands temperatures up to 204°C sustained and 316°C intermittent.

Zinc 95 forms a high-adhesive, flexible coating that lasts longer than other products.

Technical Specifications	
Flashpoint	42°C
Continuous film	.0015 thickness
H ₂ O Solubility	Negligible
Does not contain	CFCs

WARNING: Consult the label for full instructions and precautions before using this product.
